## Education

---

### Bachelor's

- Bachelor of Technology (BTech.) in Computer Engineering | CGPA: 7/10

2019 - 2022

(expected)

### Diploma

- Diploma in Computer Engineering | Aggregate: 71.09%

2019

## Technical Skills

---

Proficient In: Java | Kotlin | Android App Development

Also familiar with: HTML | CSS | JavaScript | Python | C++ | Git

## Projects

---

### Shree Boutique

Shree Boutique is an android app made for a client as a freelance project for solving boutique owner's day-to-day life problems by using the app. App is built using Kotlin, RoomDB and Firebase.

- Owner can easily store data related to their customers like sizes, contact no. etc.
- Owner can add and keep track of their bookings and date of delivery to increase their productivity.
- Owner can manage their employee's information like salary, data of joining etc.
- App is having a clean and minimal UI, UX experience which makes this app very handy to use.

### YA Notes

YA Notes is an android app developed using Java, RoomDB. In this app user can store any sort of information whether it is important links, images,

- Users can enable and disable fingerprint authentication so that only authenticated user can access the app.
- Users can perform all the CRUD operations on the Notes.
- Users can also create a new note directly by sending data to app from sharing menu.
- Users can also create a new note by long pressing the icon from home screen and accessing shortcuts.

### Wall - E

Wall - E is an android app developed using Java, Html / CSS, JavaScript, and jQuery. This app is basically a wallpaper downloading app for clients with an admin panel webapp.

- Admin can upload wallpapers and can also create categories for wallpapers from admin panel.
- Users can display, download the wallpapers from the app and can also set the images as their mobile wallpapers.
- Users can also share the wallpapers to other apps e.g., WhatsApp, Messenger etc.
- Users can also save the wallpapers to their favorite's which requires them Sign-In with Google in the app.
